

Web3, SecOps, and Kubernetes FinOps at Its Core

Save Cloud Costs, Efficiently !

An Invincible Product

What's *Broken* in Today's Market

1

Excessive Alerts

Lack Of Action

Resource Waste

2

Inflated Cloud Bills

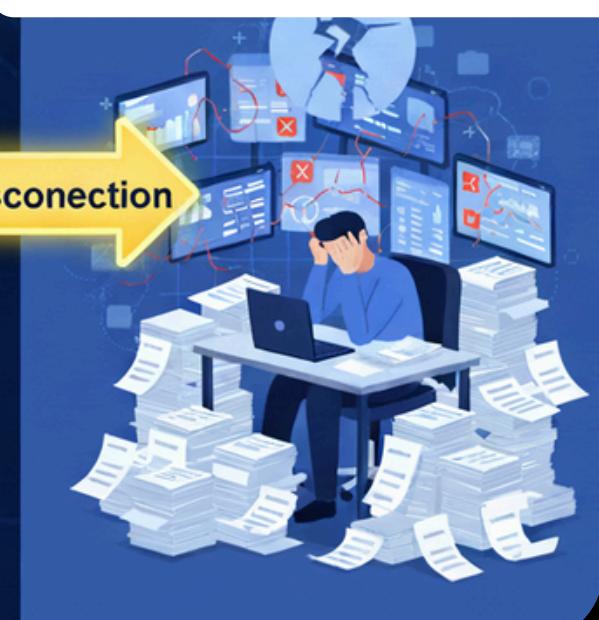

Siloed Operations

3

Fragmented Visibility & Control

Our Solution Reimagined

- Unified multi-cloud visibility
- Insight-driven FinOps decision-making
- Built-in SecOps risk posture management
- Integration with Web 3 - Smart Contracts ; Gas - Fee Analyzer

Cloudtuner.ai

Key Features.

Web3 Suite

Smart-contract audit, gas-fee analyzer, with upcoming ideal-chain recommendations and real-time security checks

K8 Optimization

Advanced K8s rightsizing, workload profiling, and cluster efficiency insights.

TTL & Budget Controls

Set automated time-to-live (TTL) and budget constraints for better governance.

Simplified view

Unified dashboards for CEO, CFO, and CTO teams with insights tailored to their needs.

AI Anomaly Detection

Spot unusual cost or security patterns instantly.

Engineering-Driven FinOps

Engage engineering teams to establish a longterm, sustainable FinOps process.

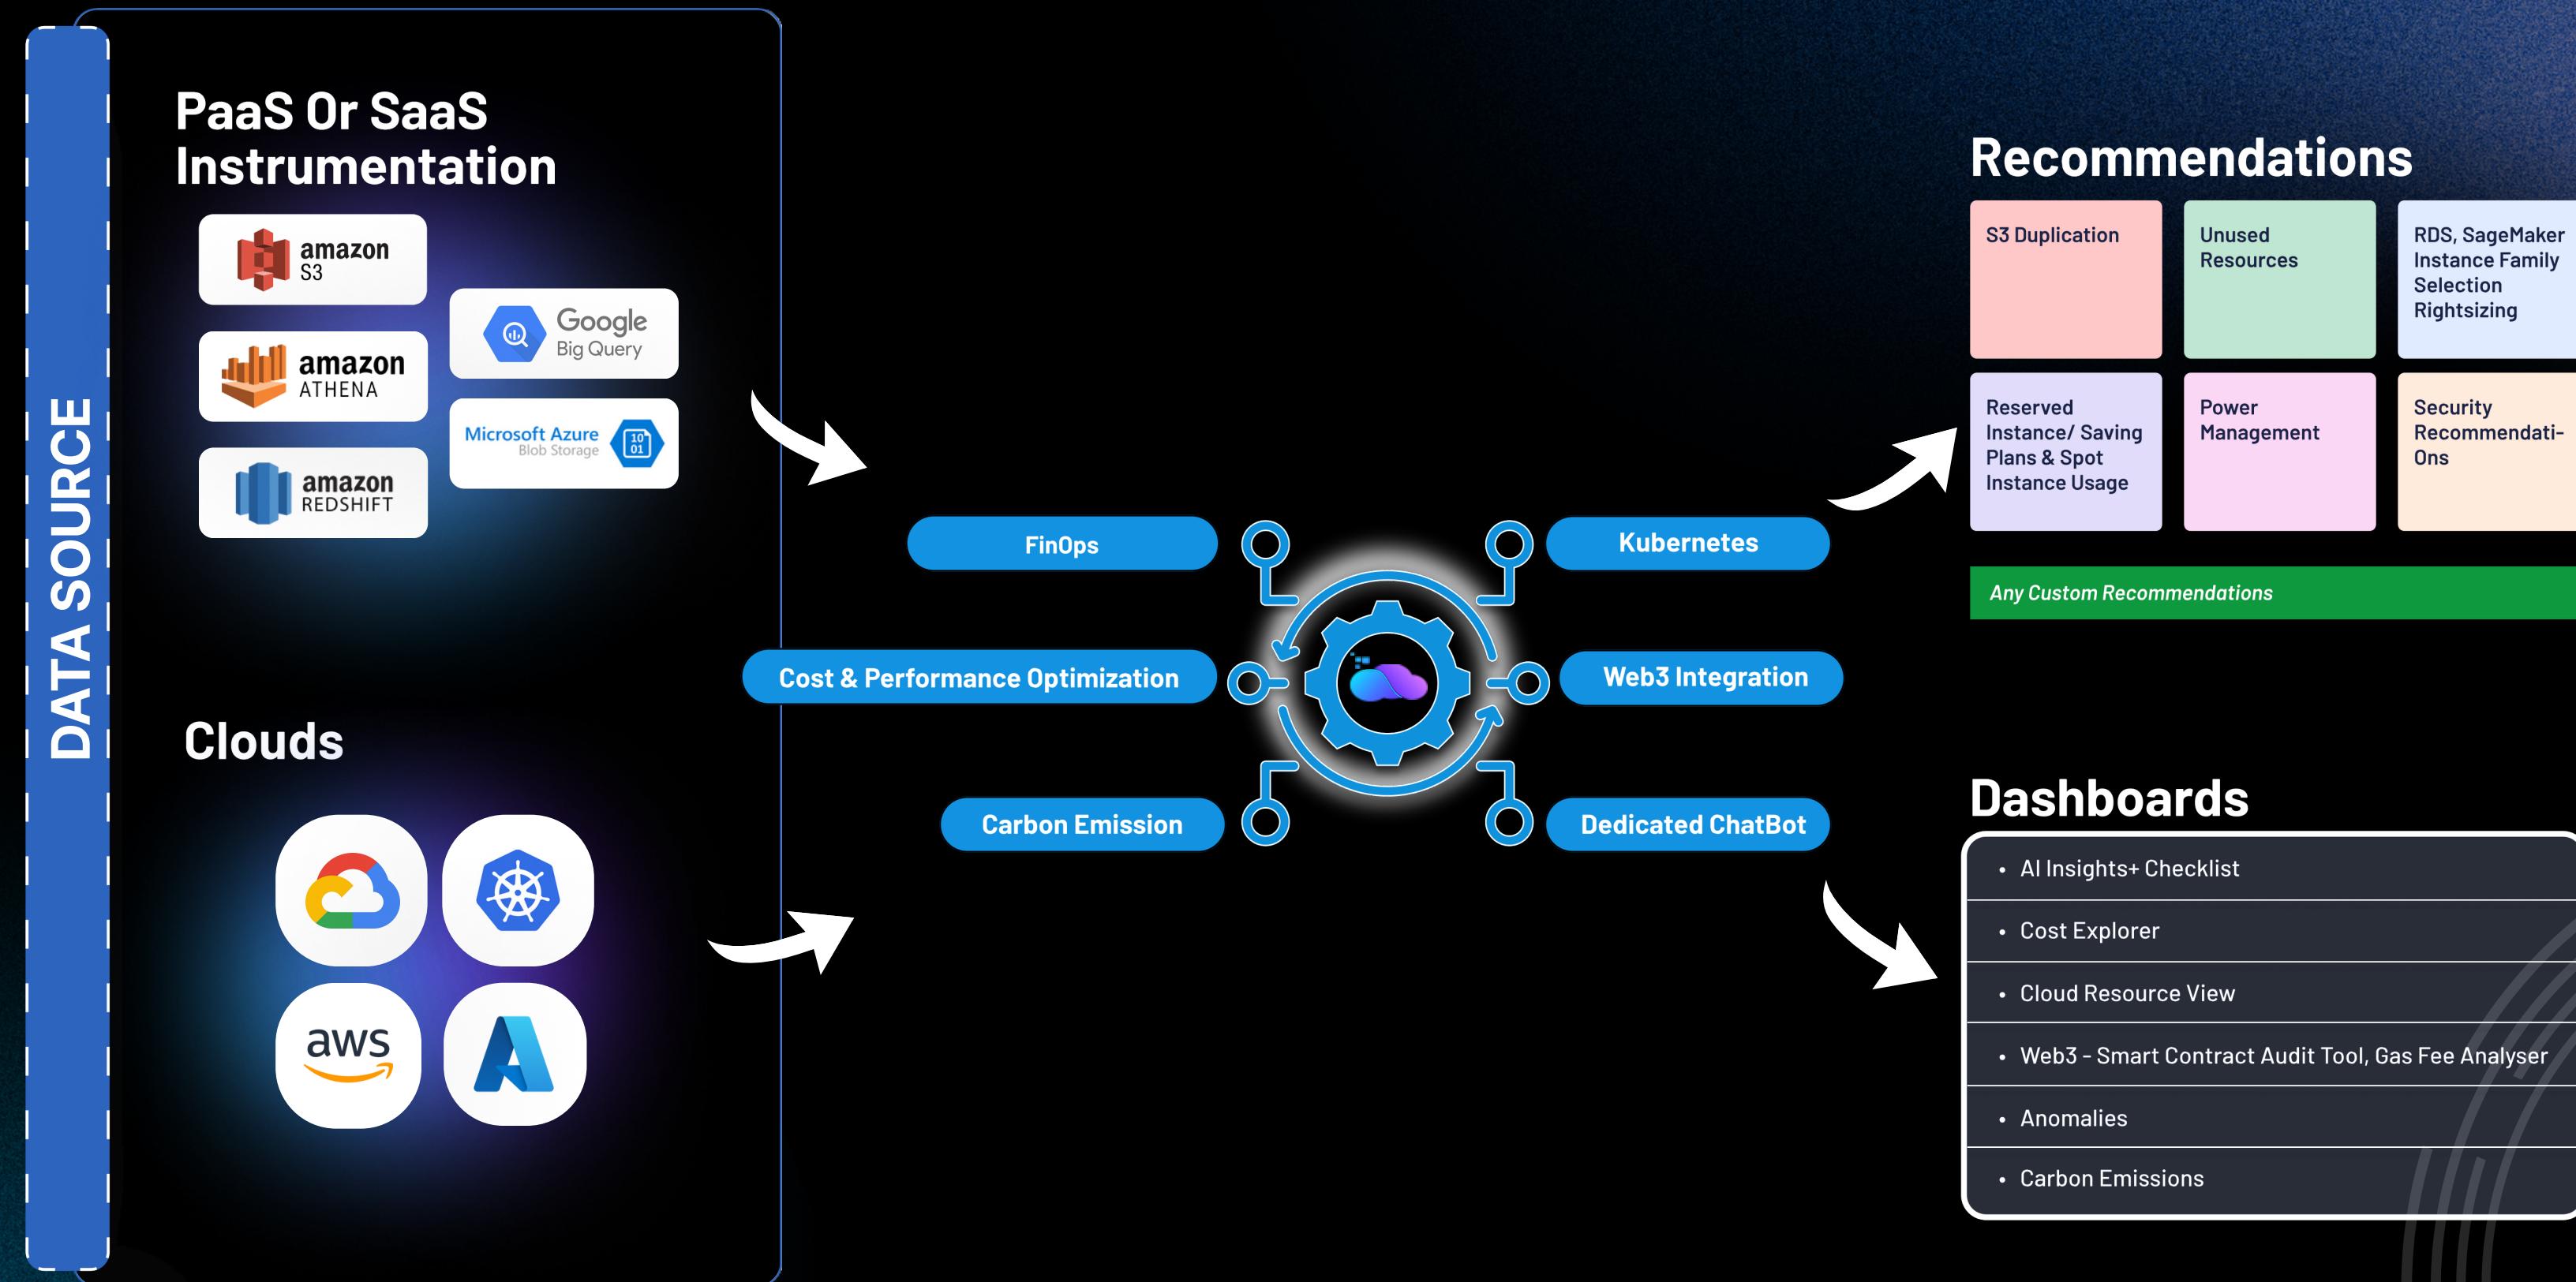

Geo & Network Traffic Mapping

Real-time editing, comments, and task updates across departments.

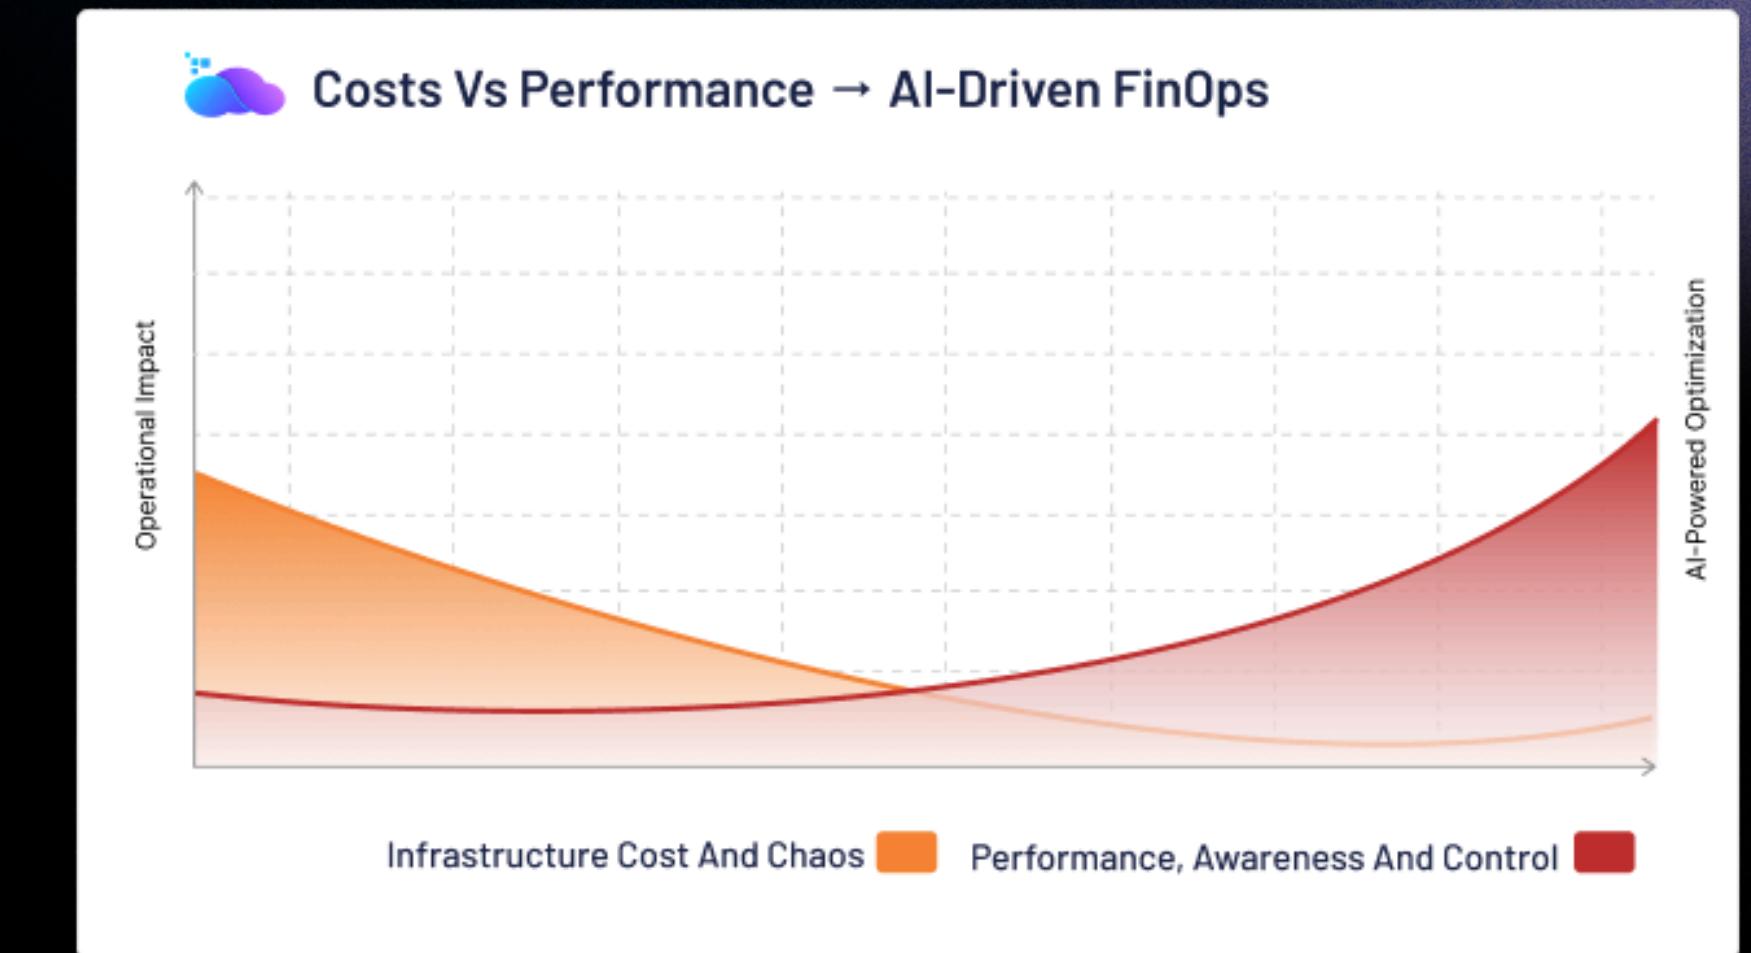

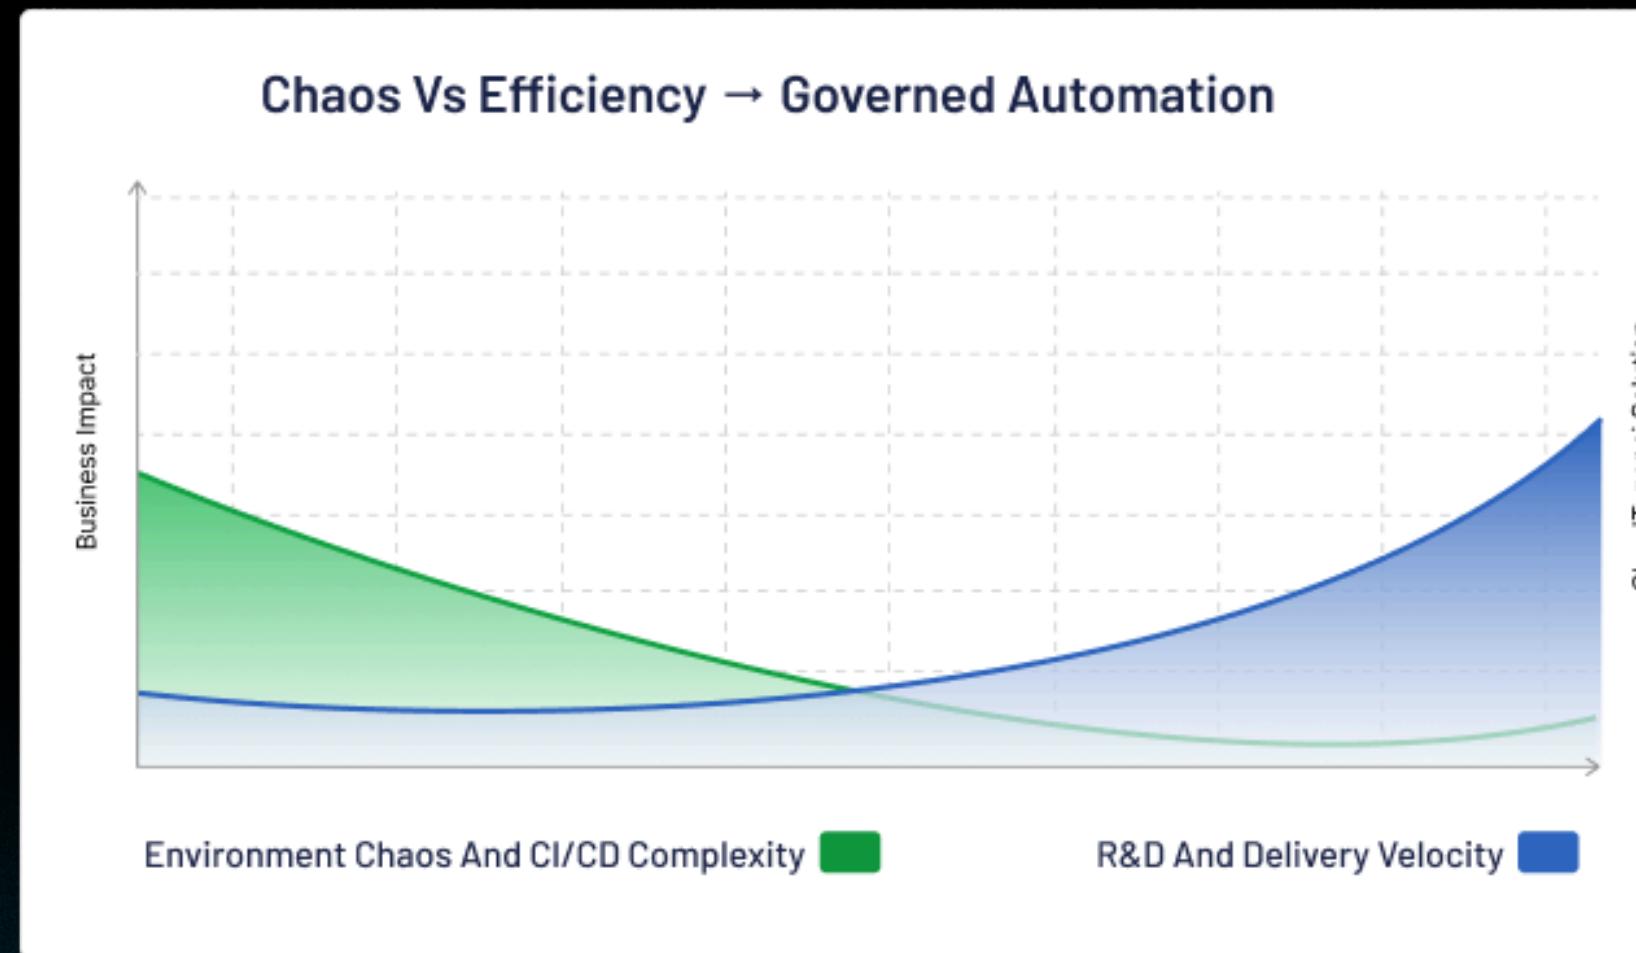

Cost Forecasting & Monitoring

Keep track of IT infrastructure costs and predict future expenses.

How *Cloudtuner.ai* Powers Results

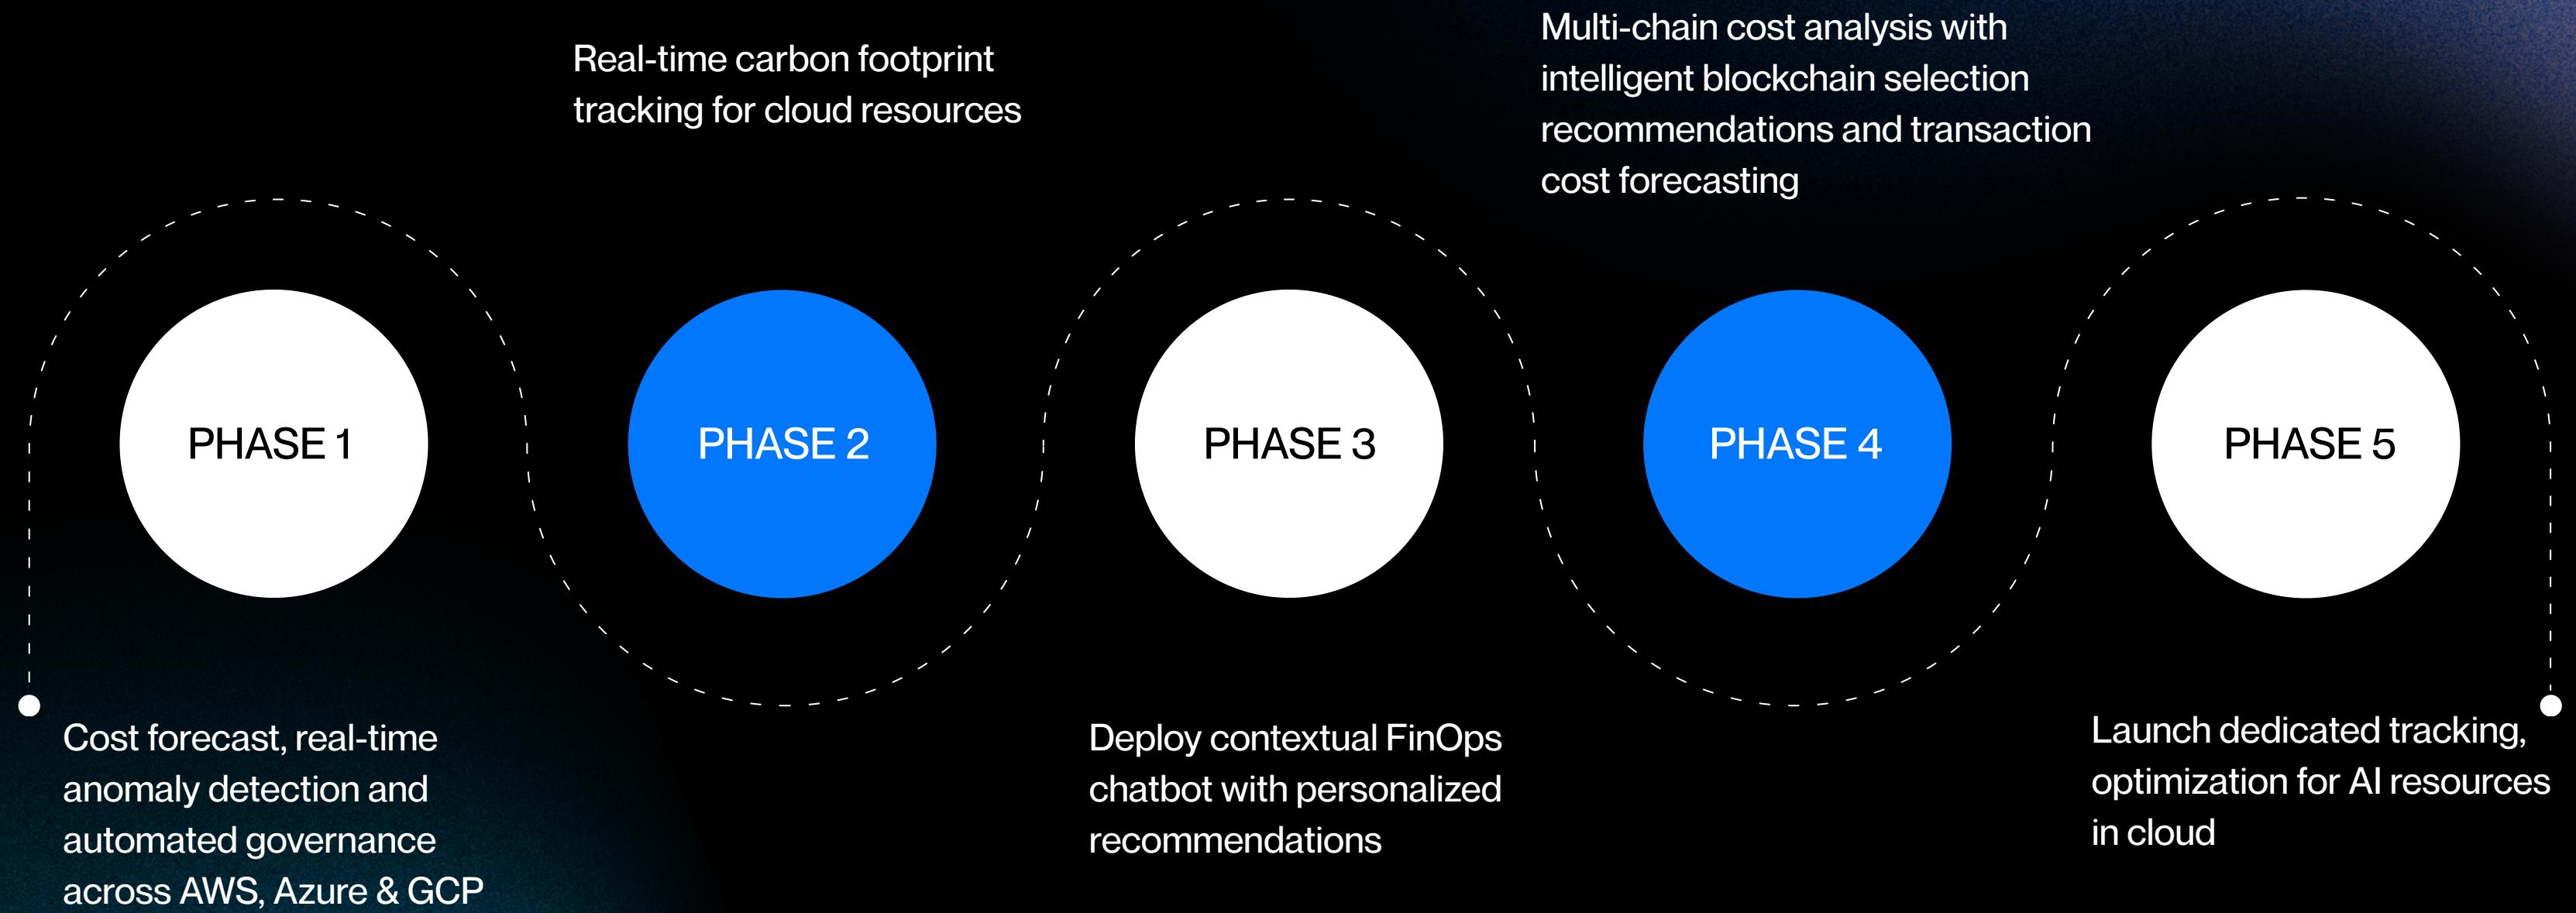

Achieve More with Cloudtuner

Lower environment chaos & CI/CD complexity
Automate governance and simplify deployment pipelines

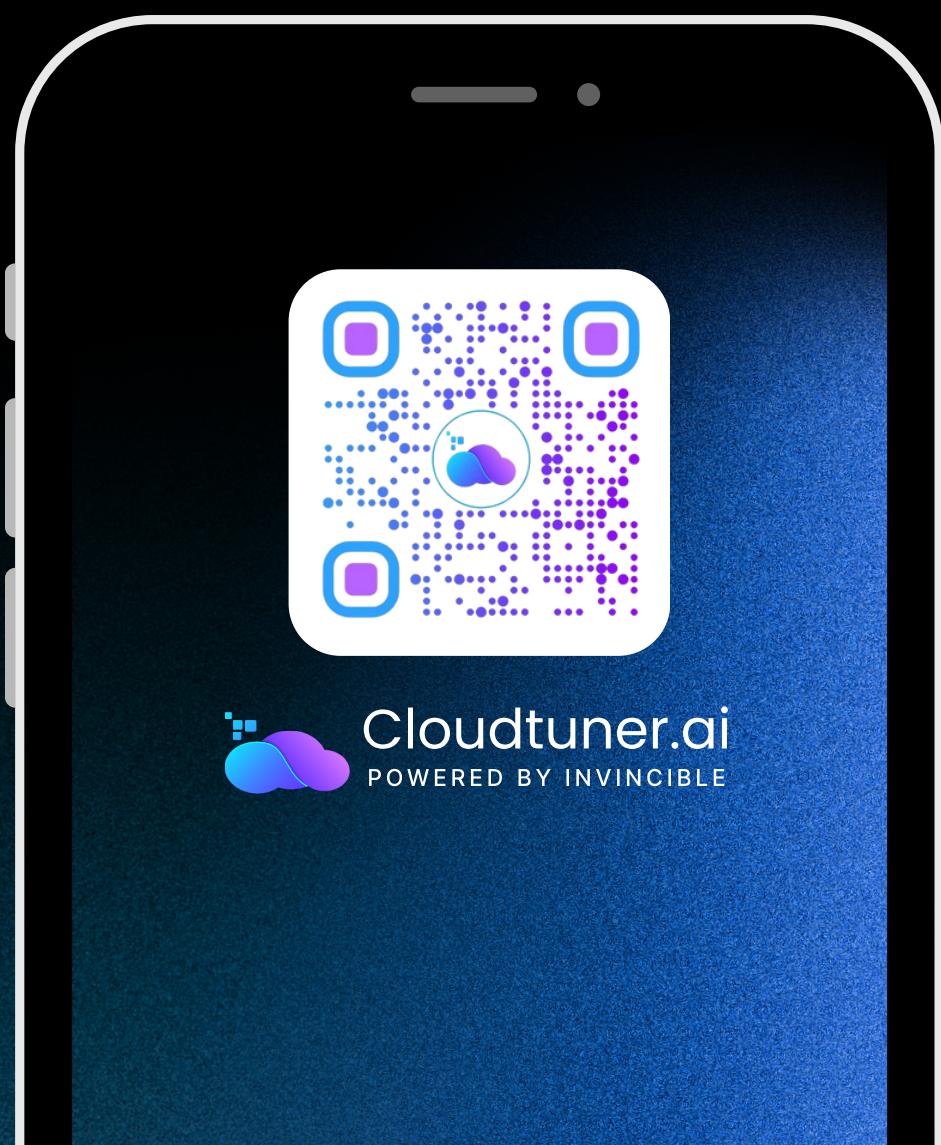

Higher R&D velocity & delivery efficiency
Enable engineering teams to focus on innovation without worrying about cost management.

Product Development Roadmap

Let's Build the Future Together
